

DETECTED WATER QUALITY RESULTS

Contaminant (Units)	Level Detected	MCL	MCLG	Likely Source of Contamination	Health Effects
------------------------	-------------------	-----	------	-----------------------------------	----------------

Violation
Yes or No

Microbiological Contaminants

Total Coliform Bacteria	40 Absent 1 Present Sampled 2007 No	More than one positive per month	0	Naturally present in the environment	
-------------------------------	--	---	---	---	--

Radioactive Contaminants

Radon (pCi/L)	Range 150-1400 Average 725 Sampled 2002 – 2003 No	None	0	Erosion of natural deposits	Presently the US Environmental Protection Agency is reviewing the setting of a standard for radon in drinking water. See radon note above on page one of this report.
Compliance Gross Alpha (pCi/L)	Range Nd – 1.1 Average 0.41 Sampled 2005 No	15	0	Erosion of natural deposits	
Uranium (ug/L)	Range nd – 7.6 Average 1.27 Sampled 2005 No	30	0	Erosion of natural deposits	
Combined Radium (pCi/L)	Range nd – 1.6 Average 0.4 Sampled 2005 No	5	0	Erosion of natural deposits
